US EPA Flyer USS Lead Site0001.pdf

Michael: This is the only other NIPSCO contact that I know of; they got a flyer about sampling (same one everyone else in Z3 got) and inquired what it is about.

Thanks,  
Rik

Janet,

Were you able to look into this matter?

Hi Joe,

I do you know who sent the flyer to you, and a copy of the flyer? That may give me an idea of what to look for.

Subject: USS Lead Superfund Site

Janet,

Somehow a flyer to have lead sampling completed was forwarded to me regarding the USS Lead Superfund Site. I assume this means that NIPSCO has a parcel or parcels within an area that USEPA is sampling as part of this Clean Up Project.

It would be helpful if SulTRAC or USEPA could provide me with an address for this parcel(s) and I can advise on the accessibility to sample. For example if it is an electric substation or gas regulator property we may not be able to allow access and to be honest risks from contact with elevated metals in soils may be low. However we could own property in the area you are evaluating that is readily accessible. With out a location had for me to know, obviously as the gas and electric utility in this area we may have multiple locations.

I will advise as quickly as I can with that information in hand. Give me a call if that is faster.
